DETAILED ACTION

All pending claims have been carefully reconsidered in view of applicant's arguments of record. The application is allowed for the following reason.

Allowable Subject Matter

Claims 1-26 are allowed.

The following is an examiner's statement of reasons for allowance:

A solid state waveguide laser having a core and a cladding, wherein the cladding is diffusion bonded to the outer surface of the core is known in the art. Meissner et al (US 5,852,622) teaches such a solid state waveguide laser as discussed in the previous office action.

However, none of the prior art fairly teaches or suggests such a solid state waveguide laser having a Lutetium-Aluminum-Garnet (LuAG) core material doped with ions. LuAG material itself is known in the art (see Kasamatsu- US 6,288,833 B1), however, none of the prior art fairly teaches that this LuAG material may be used in a solid state waveguide device having diffusion bonded cladding, such as the one taught in Meissner.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
